

Health, Safety, Environmental & Energy Policy

Prysmian Group North America

We are committed to producing products in a safe and environmentally sound and responsible manner and consider the protection of employee safety, health and the environment as core values of the organization.

We will continually strengthen our Health, Safety and Environmental performance to:

- Achieve zero injuries and illnesses through hazard elimination, risk reduction and safety programs that involve all employees, enabling everyone to do their job right, in a safe and healthy workplace.
- Minimize our impact on the environment by reducing the use of natural resources, optimizing energy performance and preventing pollution through thoughtful material selection and use, implementation of best practices, and process improvements in our facilities.
- Manage our facilities, processes and materials in a way that meets or exceeds legal and regulatory requirements and minimizes risk to our associates, the public and communities where we operate.

Our ultimate goal as an organization is to create a Zero & Beyond culture that motivates each of us to care for our own health and safety and that of those around us, and to be role models for safety and environmental excellence for our families and communities.

- Prysmian Group North America CEO Andrea Pirondini
